

Fund objective

The investment objective of the fund is to provide long-term capital growth. There is no guarantee that the fund will meet its objective.

Fund style

The fund will be managed with a bias towards global equities due to the superior long-term returns from this asset class. If prospective returns from equities are unattractive, exposure to other asset classes, such as real estate, bonds or cash, will increase.

Portfolio manager

Rory Spangenberg joined Northstar in January 2017 as an analyst, with a focus on global research and investments. Rory joined Northstar from SignalHill Investment Management, where he was the managing director and portfolio manager.

Prior to forming SignalHill, Rory spent 10 years with Investec managing value and income growth strategies. Experience prior to that includes: heading the South African research sales desk at Investec, London; re-search sales for Barnard Jacobs Mellet; and equity portfolio manager of the Sasol Pension Fund.

Portfolio manager quarterly comment

Portfolio Review:

Emerging Market and Asia equities performed strongly during the quarter, with the MSCI Emerging Market and Stoxx Asia 600 indices rallying 8.7% and 4.4% respectively. Currency movements played a large roll in the US dollar returns, with the Japanese Yen appreciating 8.1% and the South Africa Rand, usually a proxy for emerging market sentiment, 4.6% stronger versus the Greenback.

Following a strong start to the year, global equity markets sold off in February as volatility returned in abundance. The Chicago Board Options Exchange Volatility Index ("The Vix"), spiked from a level of around 10 in January to over 35 during the first week of February, leading to a broad-based sell-off in equities.

Despite enduring a volatile quarter, technology stocks, as represented by the MSCI World Technology Index, nevertheless managed to deliver the best sector returns, rising 3.2% during the quarter. Consumer Discretionary (+1.5%), principally Amazon.com (+23.7%), was the only other sector to close in the black. Cyclical and interest sensitive sectors fared worst, with Telecom Services (-6.4%) and Energy (-6.1%), leading the downside.

Cognizant Technology Solutions (+13.6%), **Boeing Co.** (+11.8%) and **Moody's Corp.** (+9.6%) were the best performing portfolio holdings during the quarter, while **British American Tobacco plc** (-13.6%), **WPP Plc** (-12.5%) and **Naspers Limited** (-12.4%) underperformed.

Portfolio Positioning:

We actively reduced the Fund's equity exposure during the quarter, from greater than 70% in January to around 65% at quarter end. This decision reflected the lower discounts our portfolio holdings traded at relative to our base case intrinsic value estimates.

In January, we sold the Fund's entire holding in **Monsanto** at \$119.70, a modest discount to the Bayer offer price of \$128, allowing for the probability of further delays in the regulatory approval process and the risk of deal not being completed at all.

In February, we sold the remaining holding in **Marriott International** at \$143.22. Despite full year earnings growth of 32% being meaningfully ahead of consensus estimates, Marriott had traded well ahead of even our most bullish estimate of Intrinsic Value. While the results confirmed much of our initial investment thesis, notably the benefits of the merger with Starwood, we felt the valuation no longer offered any margin of safety and therefore chose to exit a long-standing holding.

Risk Profile

While the manager may diversify across all asset classes, the fund is expected to be meaningfully invested in equities over time. This fund is deemed to be medium to high risk in relation to other asset classes due to its exposure to shares and stocks. The price of shares and the income from them may fall as well as rise and investors may not get back the amount they have invested.

Irish domestic law implementing EU and United Nations sanctions may limit or prohibit investment in certain markets and this may have an adverse impact on the operations of the Fund. Investing in international companies means that currency exchange rate fluctuations will have an impact on the Fund returns. Foreign currency shortages in some markets could reduce the fund's ability to repatriate funds. The investment manager aims to reduce the overall risk by their value and fundamental stance. Other risks are Settlement and Clearing Risk, Political Custody Risk, Legal Risk, Efficient Portfolio Management Risk, Reinvestment of Cash Collateral Risk And Securities Lending Risk.

Further information regarding risk can be obtained by reference to the Prospectus and Supplement.

Regulatory statement

The Fund is a sub-fund of the Sanlam Global Funds plc, an open-ended Umbrella type Investment Company, with segregated liability between its sub-funds, authorised by the Central Bank of Ireland, as a Retail Investors Alternative Investment Fund, a category of non-UCITS collective investment scheme to which the Companies Act 2014 and Chapter 1 of the AIF Rule Book applies.

The Fund is managed by Sanlam Asset Management (Ireland) Limited, Beech House, Beech Hill Road, Dublin 4, Ireland, Tel + 353 1 205 3510, Fax + 353 1 205 3521 which is authorised by the Central Bank of Ireland, as a UCITS Management Company, and an Alternative Investment Fund Manager, and is licensed as a Financial Service Provider in terms of Section 8 of the South African FAIS Act of 2002.

The Sanlam Global Funds Plc full prospectus, the Fund supplement, and the MDD is available free of charge from the Manager or at www.sanlam.ie. This is neither an offer to sell, nor a solicitation to buy any securities in any fund managed by us. Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant fund, and the relevant subscription/application forms, all of which must be read in their entirety together with the Sanlam Global Funds plc prospectus, the Fund supplement and the MDD. No offer to purchase securities will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. A schedule of fees and charges and maximum commissions is available on request from the Manager.

This is a Section 65 approved fund under the Collective Investment Schemes Control Act 45, 2002 (CISCA). Sanlam Collective Investments (RF) (Pty) Ltd is the South African Representative Office for this fund.

The information to follow does not constitute financial advice as contemplated in terms of the South African Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk.

Independent professional financial advice should always be sought before making an investment, decision, not all investments are suitable for all investors. Collective investment schemes are generally medium to long term investments.

Please note that past performance is not necessarily a guide to future performance, and that the value of investments / units / unit trusts may go down as well as up. Changes in exchange rates may have an adverse effect on the value, price or income of the product. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending.

Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ based on the initial fees applicable, the actual investment date, the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Trail commission and incentives may be paid and are for the account of the Manager. The Manager has the right to close any Portfolios to new investors to manage them more efficiently

in accordance with their mandates. The Manager retains full legal responsibility for this fund. Performance figures for periods longer than 12 months are annualized

Glossary Terms

Annualised total returns

Annualised return is the weighted average compound growth rate over the period measured.

Capital growth

Capital growth is the profit made on an investment, measured by the increase in its market value over the invested amount or cost price. It is also called capital appreciation.

Equities

Equities are shares that represent an institution's or individual's ownership in a listed company. These shares are also the "vehicle" through which they are able to "share" in the profits made by that company. As the company grows, and the expectation of improved profits increases, the market price of the share will increase which translates into a capital gain for the shareholder. Similarly, negative sentiment about the company will result in the share price falling.

Shares / equities are usually considered to have the potential for the highest return of all the investment classes but also have the highest level of risk i.e. share investments have the most volatile returns over the short term. An investment in equities should be viewed with a 7 to 10 year horizon.

Undervalued equity stocks (Value investing approach)

This is a strategy of selecting shares that trade for less than their intrinsic values. Value investors actively seek stocks that they believe the market has undervalued. They believe the market overreacts to good and bad news, resulting in stock price movements that do not correspond with the company's actual long-term fundamentals. The result is an opportunity for value investors to profit by buying when the price is deflated.

Securities

A general term for shares, bonds, money market instruments and debentures.

Collective investment scheme (CIS)

Collective investment schemes (also called unit trusts) are portfolios of assets such as equities, bonds, cash and listed property, in which investors can buy units. They allow private investors to pool their money together into a single fund, thus spreading their risk across a range of investments, getting the benefit of professional fund management, and reducing their costs.

Total Expense Ratio (TER)

This is the total costs associated with managing and operating an investment (administration, financial planning and servicing fees). These costs consist primarily of management fees and additional expenses such as trading fees, legal fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets under management to arrive at a percentage amount, which represents the TER.

Standard deviation

Standard deviation (also called monthly volatility) is a measure of how much returns on an investment change from month to month. It is typically used by investors to gauge the amount of expected volatility in an investment.
